DETAILED ACTION

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-3 are rejected because it is not clear what the preamble and functional language of claims 1 and 3 mean. Since Applicant recites components and limitations prior to the transitional language "comprising", it appears that Applicant is attempted to draft Jepson claims. However, Applicant does not recite an improvement over the prior art. Clarification and correction are required.

Claim 1(a) and (c) are rejected because the term "predetermined" is indefinite.

Claim 1(d) and (f) are rejected because it is not clear what constitutes "a fine processing step."

Claim 1(e) is rejected because it is not clear what happens to the additive in this step.

Claim 2 is rejected because it is not clear what constitutes the "fine processing step."

Claim 3(a) and (c) are rejected because the term "predetermined" is indefinite.

Claim 1(d) is rejected because there is no antecedent support for "the charged solution." Also, it is not clear what constitutes "fine processing means."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for teaching methods of making fuel emulsions.
